

RENZ®

BINDING AND LAMINATING SYSTEMS

RENZ WP 300

Automatic dispenser for
RENZ RING WIRE®
wire comb binding elements
on RENZ WIRE PACK®

SEMI-PROFESSIONAL LINE

FEATURES

- [+] Quicker loading of paper through automatic feeding of RENZ RING WIRE®, wire comb binding elements.
- [+] Up to 70% faster binding than standard operation.
- [+] Over 500 bound books p/hr* possible, in combination with electric closing machines RENZ ECL 360 / 500 / 700.
- [+] Electric display for quick automatic set up of different WIRE PACK® sizes

*Depends on product, logistics and operator

Electric display for quick automatic set up of different WIRE PACK® sizes by entering the corresponding number.

By pressing foot pedal RENZ RING WIRE® comb binding element is removed and dispensed automatically from WIRE PACK®.

Pre punched paper is loaded onto dispensed ring wire element.

The loaded book is then manually lifted off and bound in a ECL 360/500/700 with the press of one foot pedal. WP 300 compliments the RENZ ECL 360 and sets up the most automated bench top binding system.

OPTIMAL MACHINE COMBINATION
WP 300 + ECL 360

Up to 70% faster loading and binding speed. Both machines can also be used as standalone units.

RENZ WIRE PACK® serves as a packing carrier for the RENZ RING WIRE® binding elements. The RENZ RING WIRE®

elements can be operated manually as well as automatically by the WP 300.

FEATURES

- [+] Wire comb binding elements are automatically provided.
- [+] Up to 70% faster binding speeds
- [+] Over 500 bound books p/hr* possible, in combination with electric closing machines RENZ ECL 360 / 500 / 700.
- [+] Set up of different pitches and diameters within seconds.
- [+] Electric display for quick automatic set up of different WIRE PACK® sizes.
- [+] Suitable for calendar binding. Two separate binding elements are provided.
- [+] The empty WIRE PACK® is transported automatically out of the WP 300.

SPECIFICATIONS - AT A GLANCE

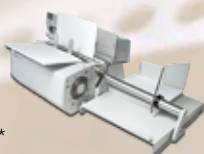

Length, width, height	54 x 36 x 29 cm
Weight	27 kg
Working width	300 mm
Possible wire diameters	3/16" bis 1"
Pitch	3:1, 2:1
Binding output in combination with RENZ ECL 360/ 500/ 700*	over 500 books p/hr*
Power supply	230 V, 50 Hz. or 115 V, 60 Hz

*Depends on product, logistics and operator

RENZ PUNCHING TECHNOLOGY
Punching companions for the WP 300.

DTP 340 M*
Electrical desk top punch working width 340 mm interchangeable punching dies punching thickness up to 3,5 mm** speed up to 500 cycles p/hr***

DTP 340 A*
Semi-automatic punching system working width 340 mm interchangeable punching dies punching thickness up to 3,5 mm** speed up to 750 cycles p/hr***

AP 360*
Fully automatic punching and perforating machine working width 360 x 360 mm interchangeable punching dies punching thickness up to 3,5 mm ** speed up to 100 cycles p/min***

* also see separate brochure
** depends on punching dies
