

RENZ AP 360 Digital

Big Returns on Investment!

by Jon Gasperini

With commercial automatic punching machines - If you do *10 punch changes in a week* you will experience at least *6 hours of downtime* while a higher paid employee makes the size adjustments and die changes.

The **RENZ AP 360 Digital** with QSA dies will reduce that number to *30 minutes* with an entry level employee capable of making the changes. They simply call up the size they're punching and press "enter" on the digital touch screen!

Over the course of a year this can amount to over **\$7,000 labor savings!** Plus your set-ups are always exact and precise - in other words less reprints!
