BYOTROL® is a revolutionary disinfectant cleaner that takes the fight against germs to a new level with the development of an advanced formula that keeps surfaces sanitized for a full 24 hours with only one application.

❖ Selected for EPA's "List N" of qualified disinfectants recommended to fight COVID-19 virus

- ❖ Eliminated 99.9% of broad-spectrum germs including...
 - Norovirus
 - Cold & flu viruses
 - E. coli
 - Salmonella
 - Staphylococcus Aureus
 - Streptococcus Pyogenes
 - Psuedomonas Aeruginosa

❖ Scientifically-proven to keep surfaces sanitized for 24 hours, even after repeated touches

- ❖ Deodorizes for 24 hours.
- ❖ Prevents mold and mildew growth for 7 days.

- ❖ Non-toxic, non-irritating disinfecting formula
 - No harsh chemical fumes
 - Non-corrosive
 - No need for gloves
 - No sticky residue

- ❖ Safe for surfaces such as metal, fabric, stainless steel, plastic, painted surfaces, aluminum, vinyl, glazed porcelain, and ceramic

- ❖ Germ-fighting technology that was developed over many years and is fully-tested and registered with the EPA in all 50 states.
 - EPA Reg. 83614-1

32 oz Unscented Sprayer

BYOTROL24 ADVANCED TECHNOLOGY

Our Byotrol technologies are truly unique in that they all deliver a residual performance made possible through our unique understanding of biocides in combination with macromolecules. Our expertise is in identifying macromolecules, which when combined with biocides extend the biocidal action. In formulation, the action of the biocide is unchanged. Quaternary Ammonium Compound (QAC) in formulation, for example, continue to act against pathogens by solubilizing the cell membrane, resulting in cell lysis and death.

Coronavirus

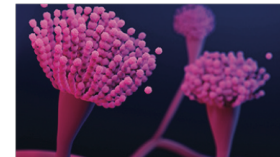

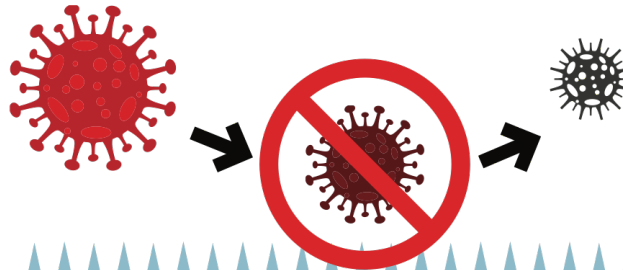

- 1) Live organism attempts to attach to surface
- 2) Byotrol24 does not allow organism to attach or survive on the surface
- 3) Organism dies

MRSA

Algae

Aspergillus

Fungus

Candida Albicans

Eliminate the Food Source.

Eliminate the Enemy!

Byotrol24 Stops Biofilm Formation.
